## Non-GAAP Financial Measures

This press release includes adjustments to operating income (loss), GAAP net income (loss), and earnings per share for the fourth quarter and fiscal year ended September 25, 2010. Adjusted operating income (loss), net income (loss) and adjusted earnings per share, are non-GAAP financial measures which exclude the impact of the impairment of an intangible asset. We believe that they are useful as supplemental measures in assessing the operating performance of our business. These measures are used by our management, including our chief operating decision maker, to evaluate business results. We exclude impairment charges which we believe are not representative of the on-going results of operations of our business and are not used to determine compliance with the financial covenants in our credit facility and indenture.

We provide this information to investors and other users of the financial statements, such as lenders, to assist in comparisons of past, present and future operating results and to assist in highlighting the results of on-going operations. While management believes adjusted operating income (loss), net income (loss) and adjusted earnings per share are useful supplemental information, such adjusted results are not intended to replace our GAAP financial results and should be used in conjunction with those GAAP results.

Below is a reconciliation of this non-GAAP (unaudited) measure to net income (loss) for the fourth quarter and net income for the fiscal year ended September 25, 2010
